

# Health Services Research and Knowledge Translation: A Learning Systems Approach

Sarah Mantwill, PhD – Swiss Learning Health System  
Department of Health Sciences & Medicine, University of Lucerne

# Outline

Health Services Research

*A multidisciplinary field*

Learning Health Systems

*An approach to knowledge translation*

The Swiss Learning Health System

*Moving HSR into policy and practice*

# Health Services Research

A multidisciplinary field

**Ignaz Philipp Semmelweis**

# Health Services Research is...

“... a multidisciplinary field of scientific investigation that studies how social factors, financing systems, organizational structures and processes, health technologies and personal behaviours affect access to health care, the quality and cost of health care and ultimately, our health and wellbeing. (...)”

Lohr & Steinwachs, 2002

# Health Services Research is...

“... a multidisciplinary field of scientific investigation that studies how **social factors**, financing systems, organizational structures and processes, health technologies and personal behaviours affect access to health care, the quality and cost of health care and ultimately, our health and wellbeing. (...)”

Lohr & Steinwachs, 2002

# Health Services Research is...

“... a multidisciplinary field of scientific investigation that studies how **social factors, financing systems**, organizational structures and processes, health technologies and personal behaviours affect access to health care, the quality and cost of health care and ultimately, our health and wellbeing. (...)”

Lohr & Steinwachs, 2002

Based on Goodman, 2017

# Triple aim of Health Services Research

Institute for Healthcare Improvement: <http://www.ihl.org>

# Health Services Research has led to...

- greater transparency in health system performance
- new payment mechanisms, such as diagnosis related groups
- improved patient engagement
- quality improvement
- national funding of health services research
- etc.

Based on Goodman, 2017

# HSR activities in Switzerland

Programme «Recherches et réalisations en médecine appliquée» (SAMS 1985)

- annually funding of CHF 200'000 for research in primary care

Federal Office of Public Health (FOPH 2012, FOPH 2015)

- need for strengthening health services research
- missing coordination of activities, lack of a structured network among different stakeholders, no targeted funding mechanism

Swiss Academy of Medical Sciences

- need for the development of health services research as a third pillar, complementing biomedical and clinical research (SAMS 2014)
- need for a national infrastructure

# HSR activities in Switzerland

Funding program “Health Services Research” of the Bangerter-Rhyner Foundation, accompanied by the SAMW (2012-2016)

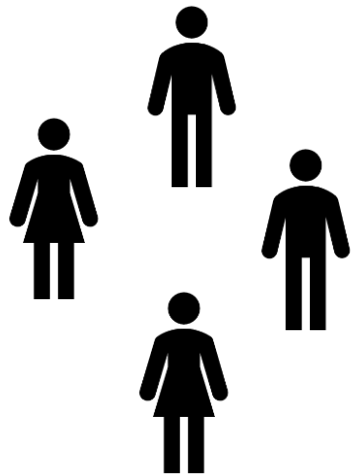

National Research Program (NRP74) – Smarter Health Care (2017 – 2022)

**Smarter Health Care**

# Learning health systems: pathways to progress

EDITED BY KABIR SHEIKH AND SEYE ABIMBOLA

Friedman, C. P. (2022)

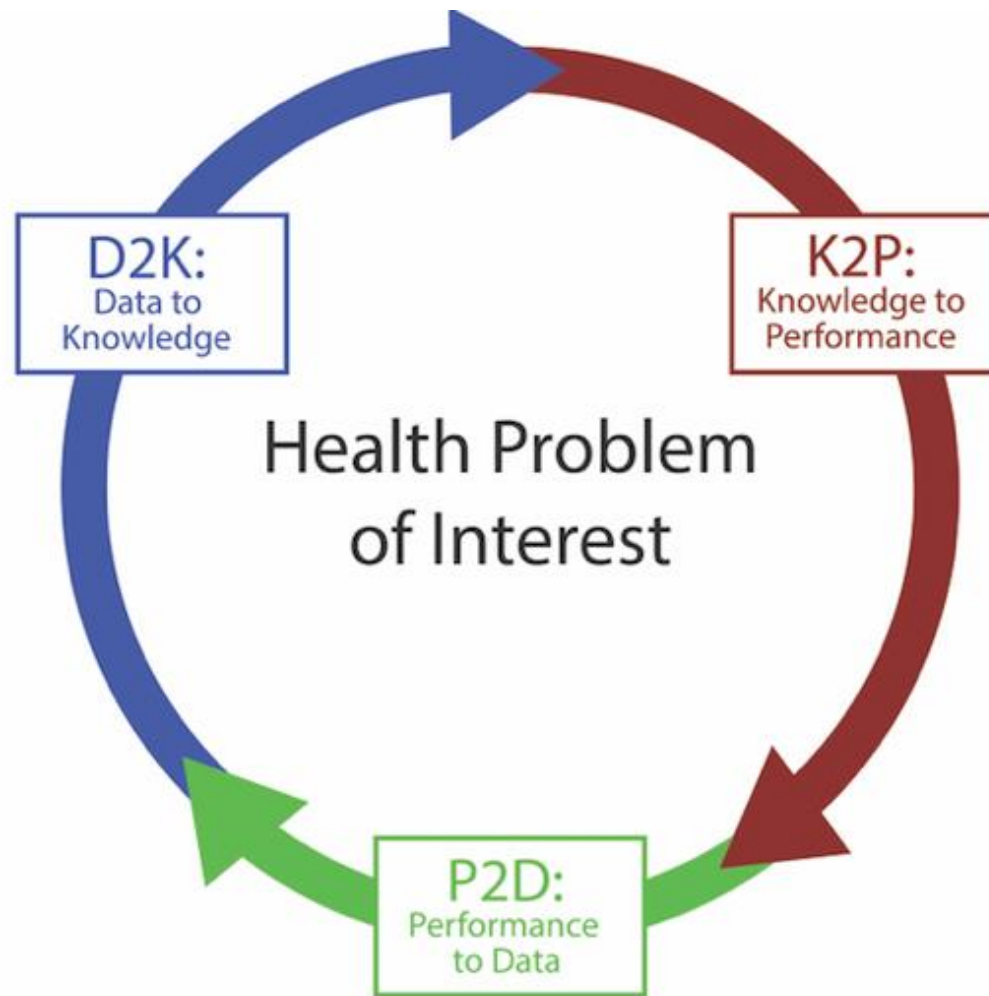

# Learning Health Systems ...

- ... are a departure from data practices that are governed by the intended use for data (research, quality improvement, clinical care, public health etc.).
- ... aim at enabling continuously and rapidly operating cycles of study, feedback, and practice change, regardless of the original intention for data collection.

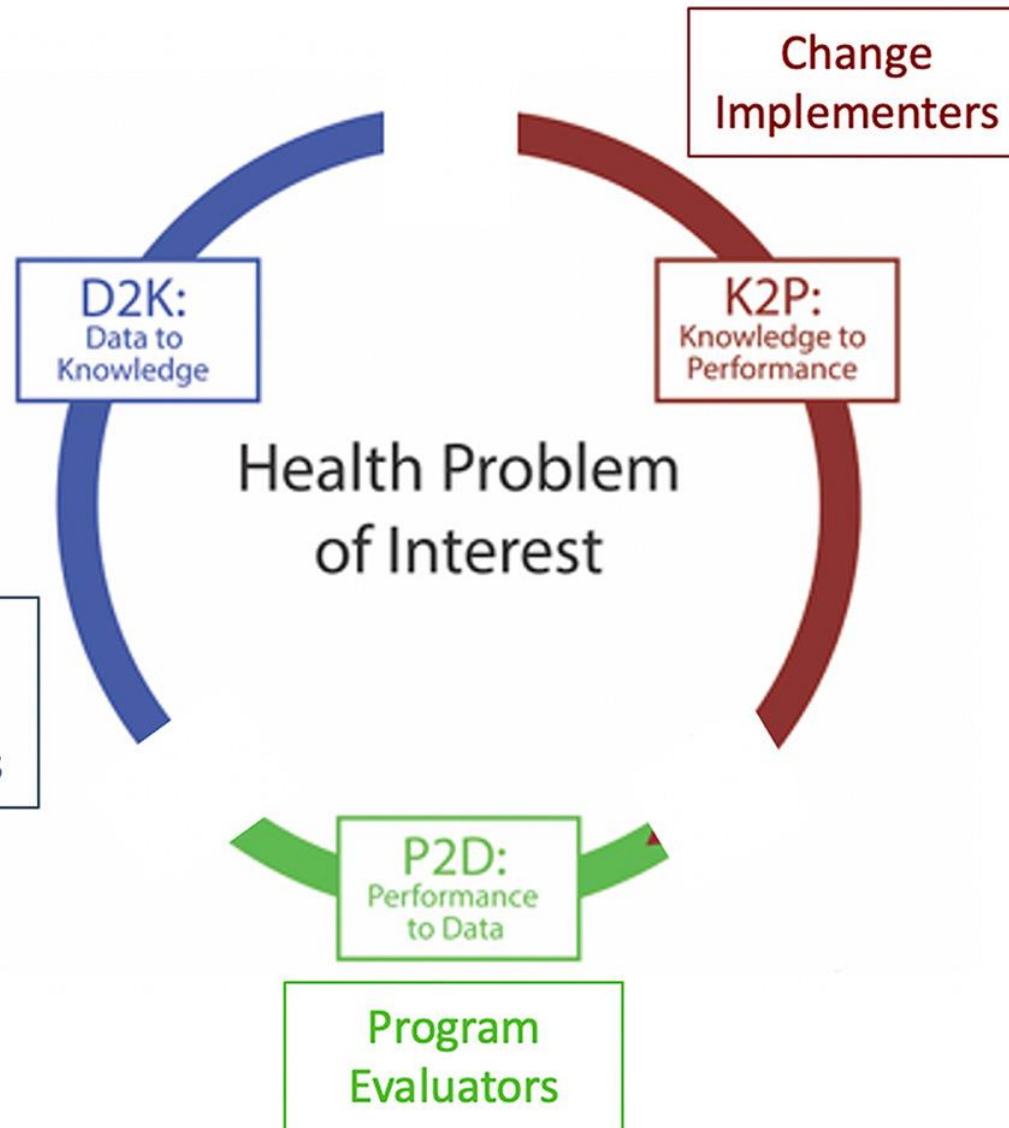

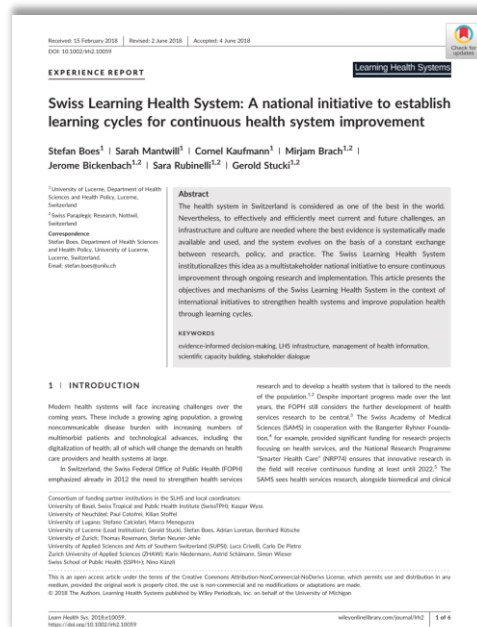

Platt, J. E., Raj, M., & Wienroth, M. (2020)

“Learning Health Systems improve individual and population health by marrying discovery to implementation (...).”

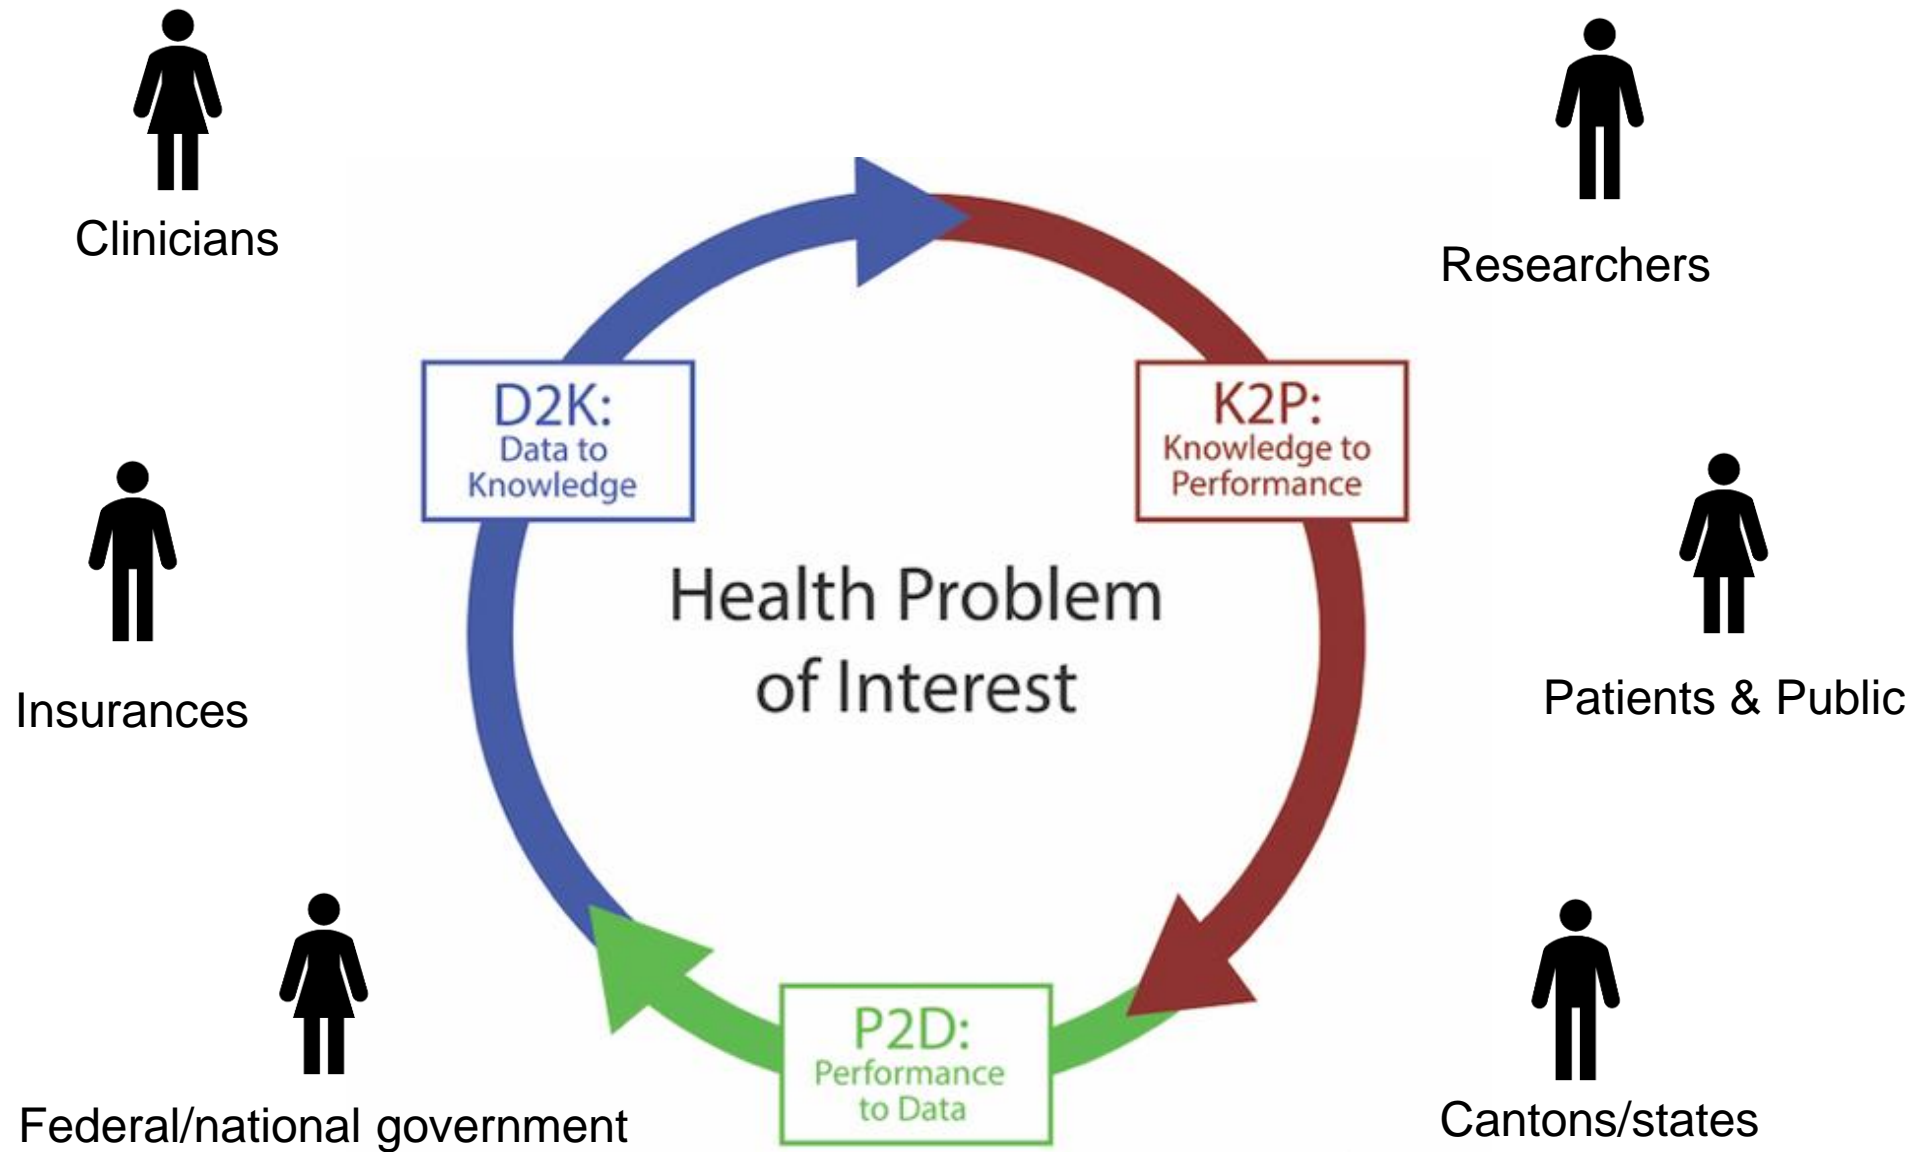

Friedman, C. P. (2022)

# The Swiss Learning Health System

Moving HSR into policy and practice

Swiss Learning Health System

# Swiss Learning Health System (SLHS)

Network: 10 universities, 13 institutes/departments

Financed by SERI and academic partners:

1st funding: 2017 – 2020  
20 PhD positions

2nd funding: 2021 – 2024  
24 PhD positions

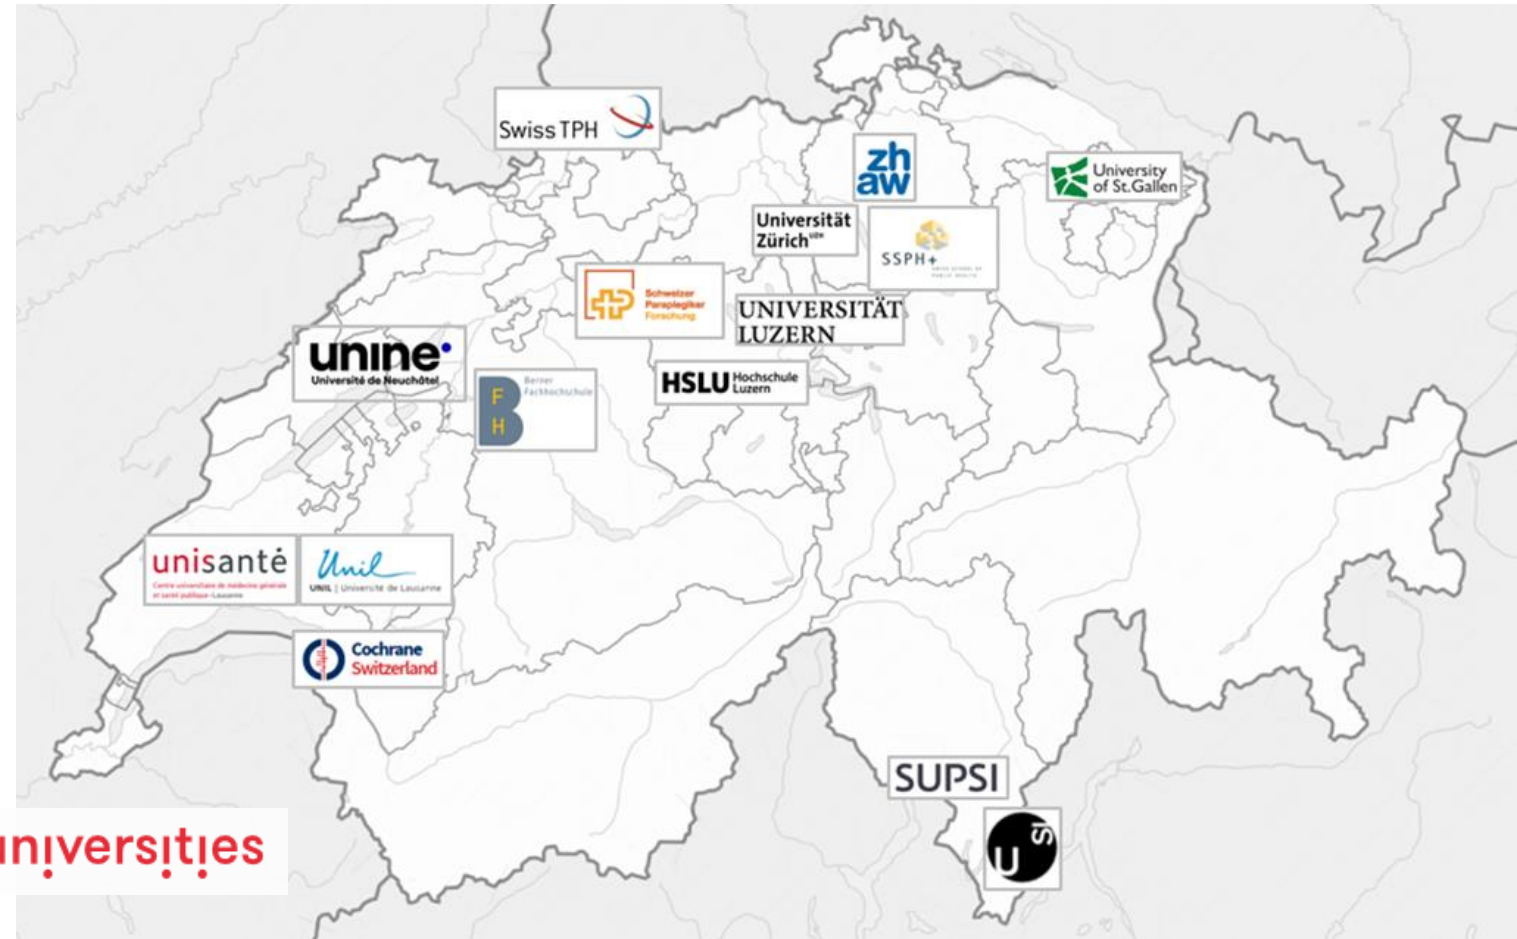

swissuniversities

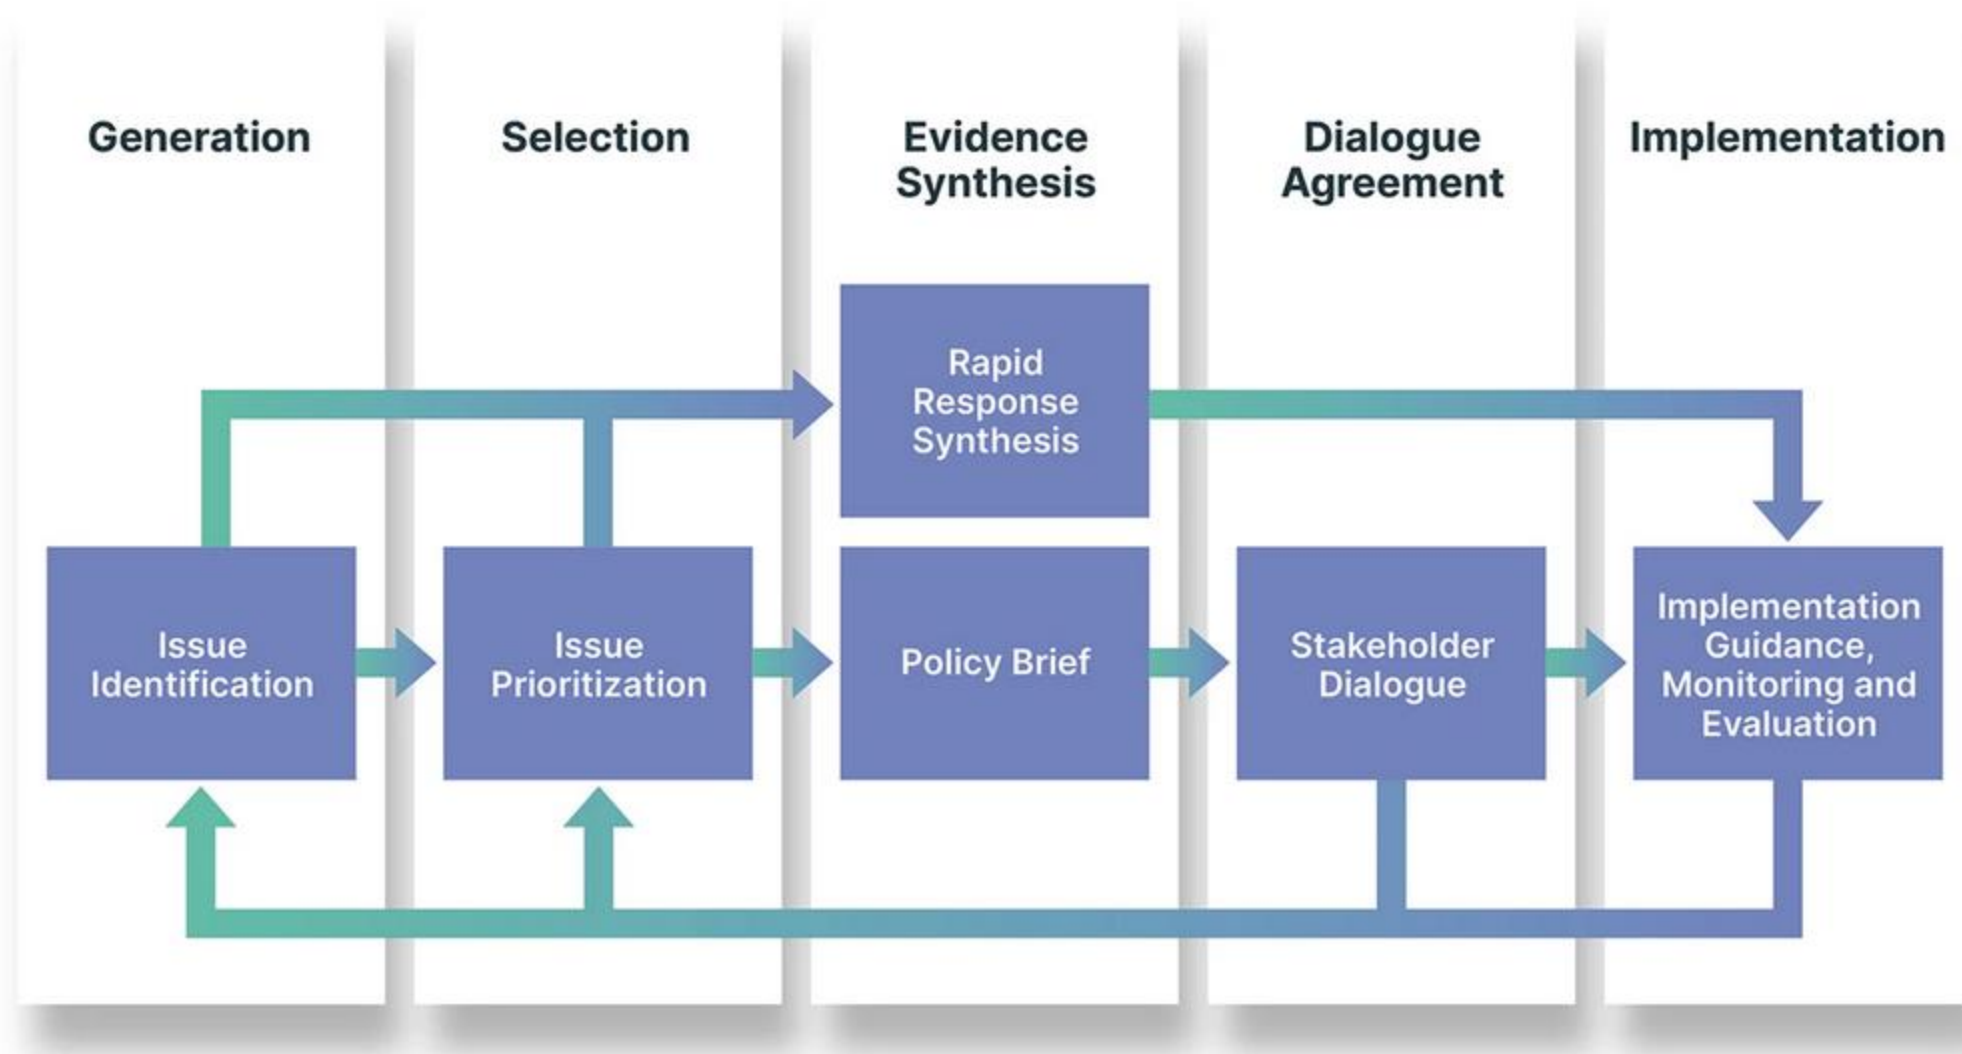

## Overarching objective of the SLHS

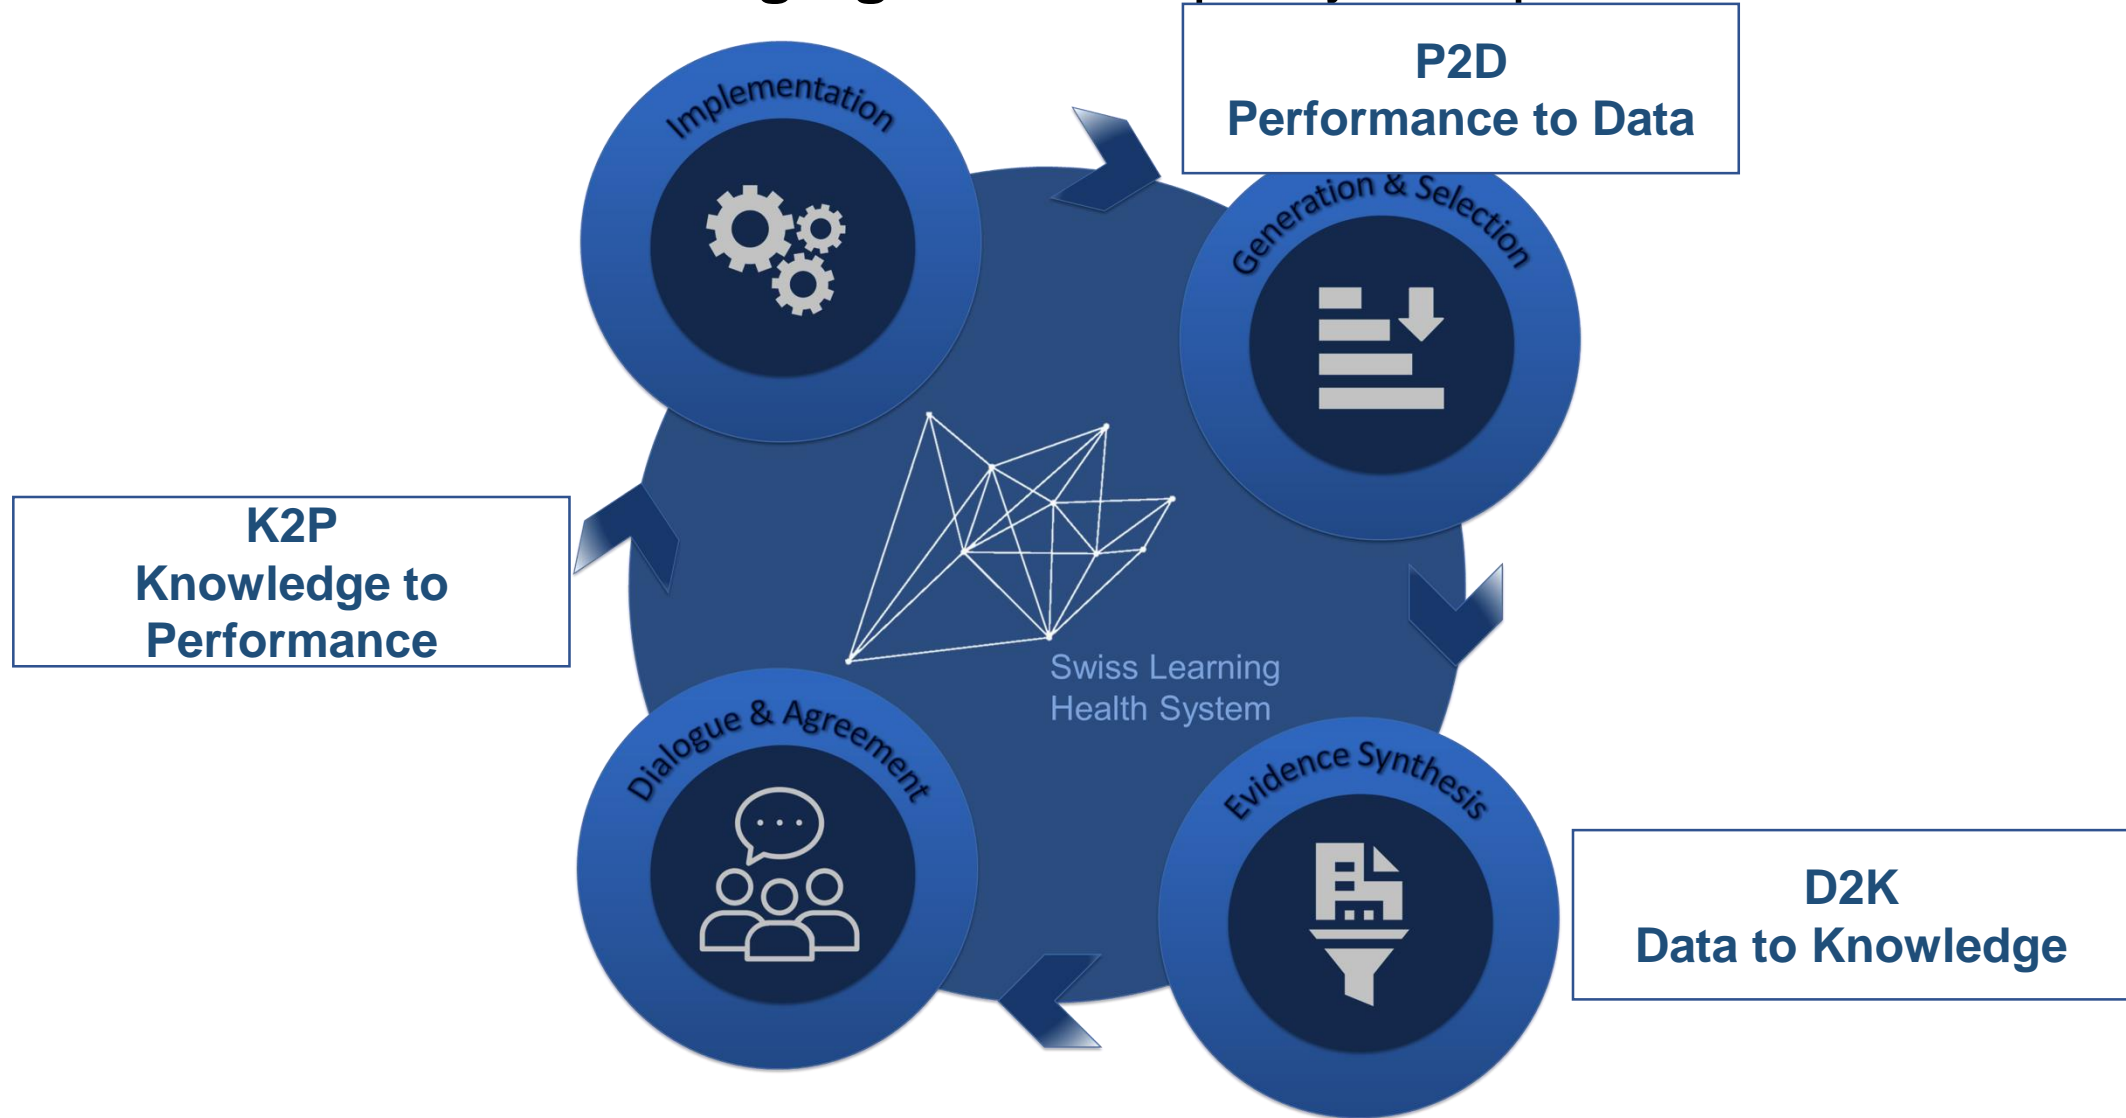

To strengthen the health system and create a culture of shared decision-making in which sound scientific evidence is continuously integrated into the health system.

swissuniversities

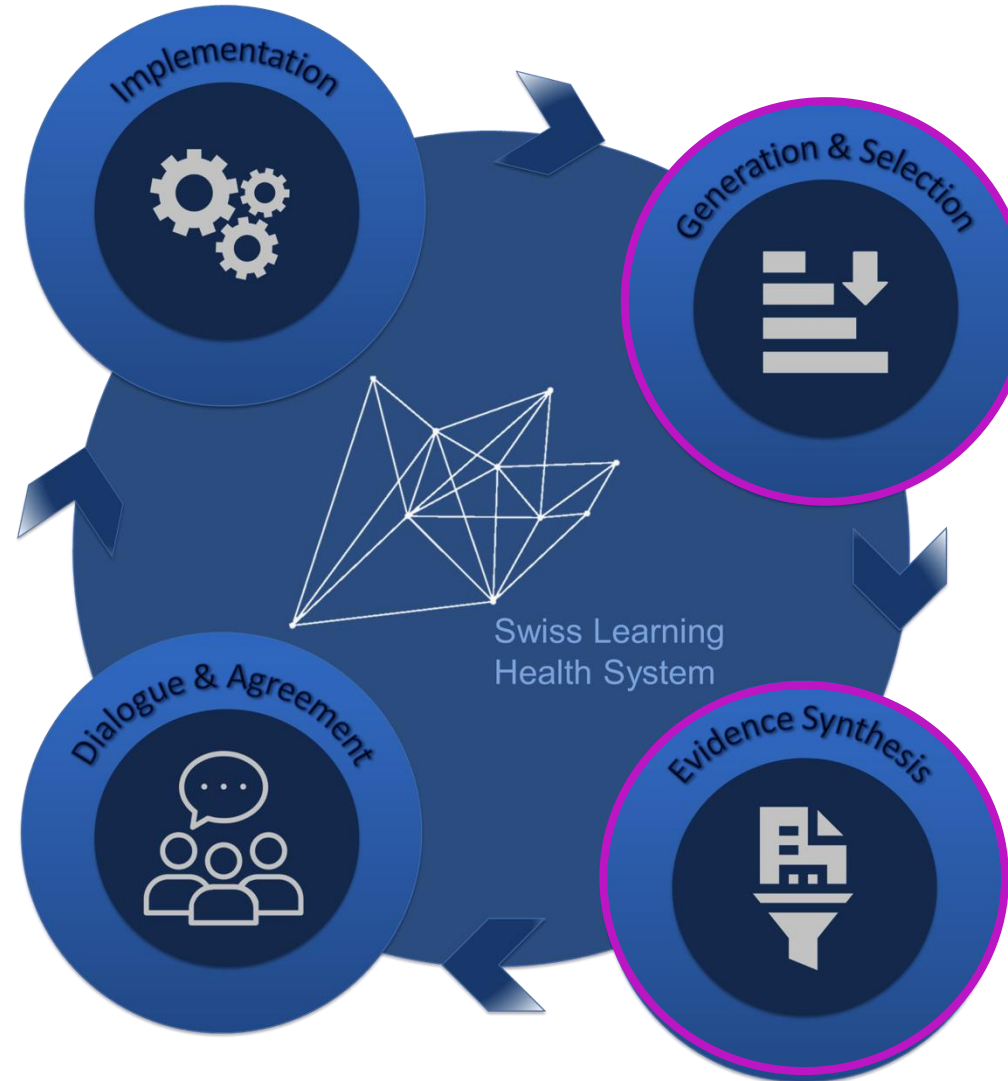

# SLHS: Bridging research, policy, and practice

# SLHS: Bridging research, policy, and practice

## Issue Identification

The SLHS identifies and prioritizes pressing topics and challenges in the Swiss health system.

## Policy Briefs

The SLHS produces evidence syntheses (Policy Briefs) as input for stakeholder dialogues.

Swiss Learning  
Health System

## How can the international guidelines for knee osteoarthritis management be implemented systematically in Switzerland?

Lea Ettlin, MSc  
Prof. Dr. Karin Niedermann

Policy Brief #6

Swiss Learning  
Health System

## Giving patients a voice about cancer care: should Switzerland do more to collect patients' experiences of cancer care?

Chantal Arditi, Isabelle Peytremann Bridevaux

Policy Brief #8

Swiss Learning  
Health System

## Professionalität in der Bildung

Policy Brief «Bildung»

## D2K: Policy Briefs

- i. describe a problem relevant to decision-makers by explaining relevant contextual factors
- ii. present a number of evidence-informed recommendations to a problem; for each possible solution explain all relevant aspects including expected benefits and costs
- iii. discuss potential barriers and facilitators to implementation of each possible recommendations

# SLHS: Bridging research, policy, and practice

## Stakeholder Dialogues

Stakeholder work and discuss issues together to solve problems in the Swiss health system.

## Policy Briefs

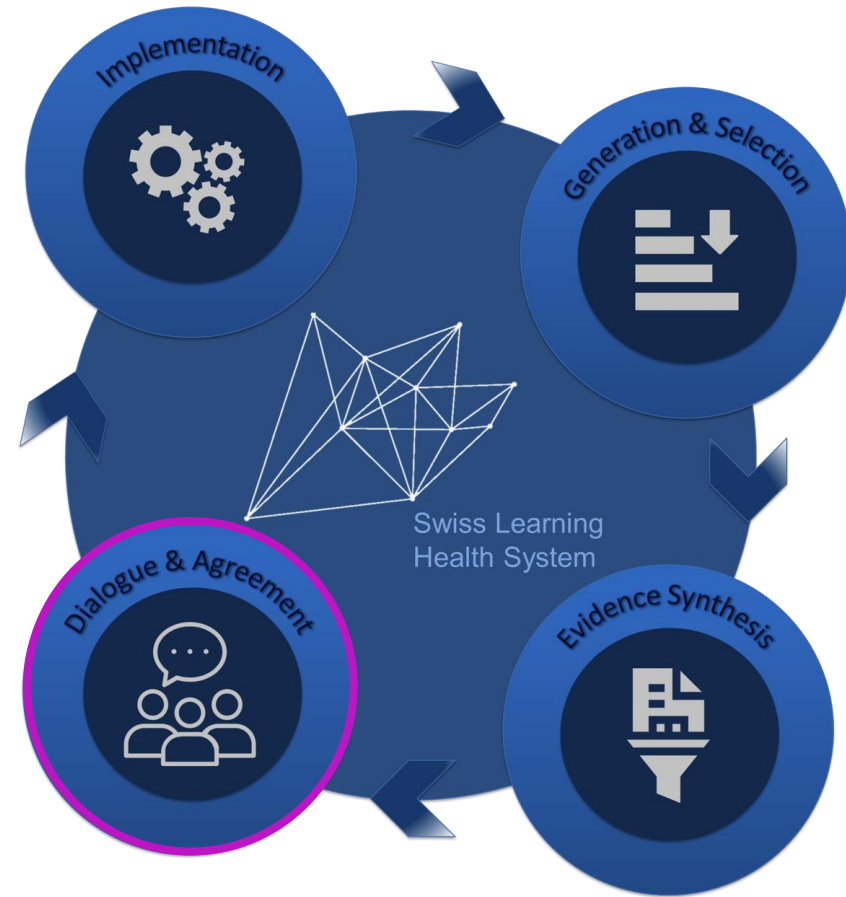

The SLHS produces evidence syntheses (Policy Briefs) as input for stakeholder dialogues.

# D2K & K2P: Stakeholder Dialogue

... is a structured communication process that uses a deliberative dialogue during which stakeholders work collaboratively toward a common understanding with the aim to reach agreement on the problem at hand.

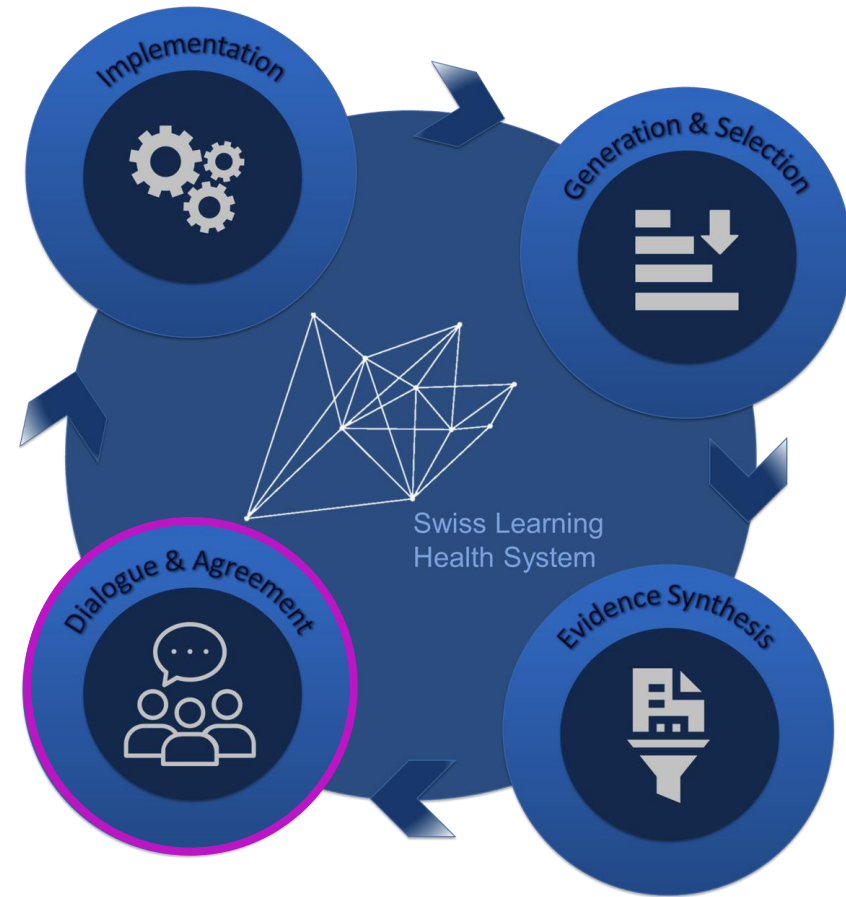

<https://www.slhs.ch>

# D2K & K2P: Stakeholder Dialogue

## Potential outcomes of a dialogue

- planning of course of action
- mission/vision statements
- (signed) agreements
- a product (toolbox)
- further/additional research

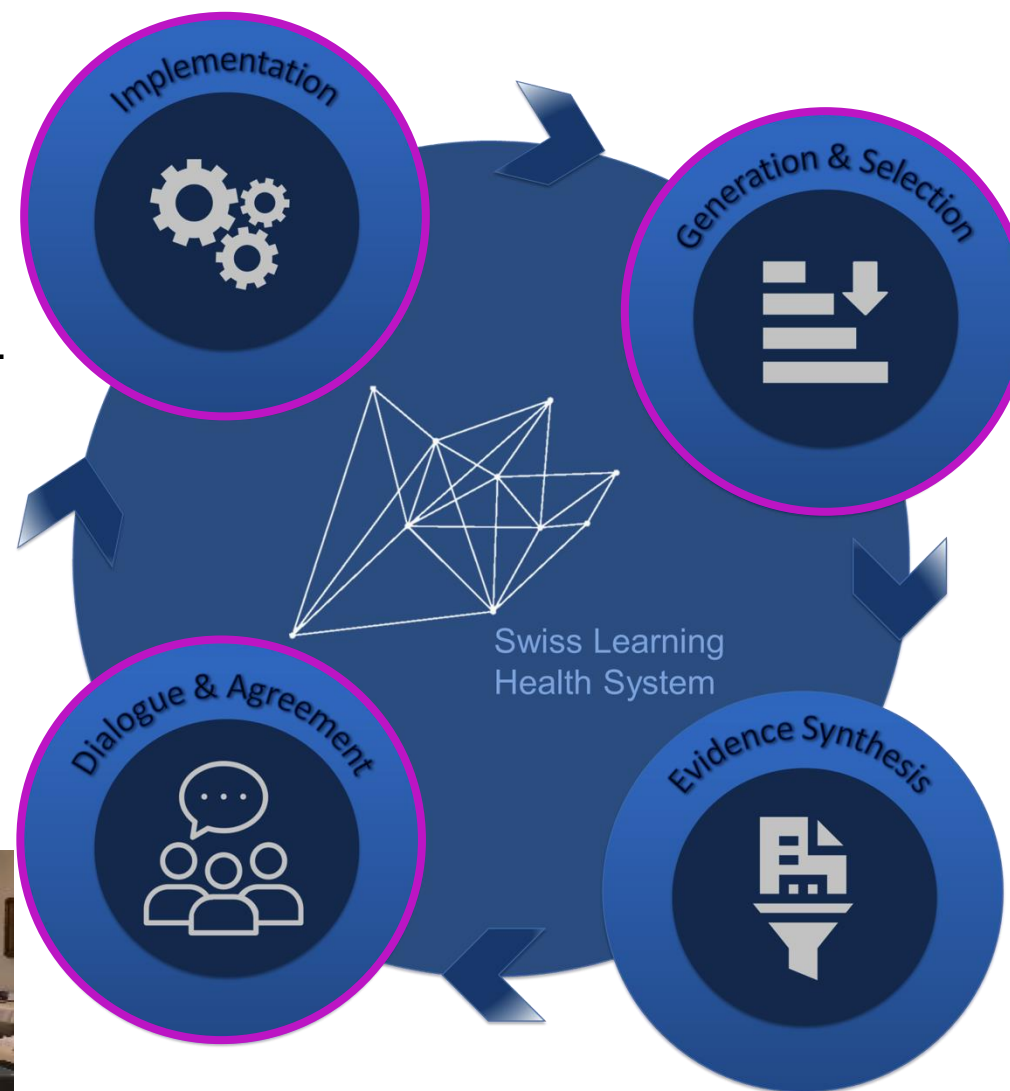

# SLHS: Bridging research, policy, and practice

## Monitoring and Evaluation

The SLHS monitors and evaluates implementation of measures to enhance the quality of health systems.

## Stakeholder Dialogues

Stakeholder work and discuss issues together to solve problems in the Swiss health system.

# Example: PREMs in Cancer Care

# Example: Interprofessional Collaboration

Swiss Learning  
Health System

Interprofessionelle Zusammenarbeit in  
der ambulanten Versorgung stärken

Interprofessionelle Zusammenarbeit an  
der psychisch-somatischen Nahtstelle  
stärken

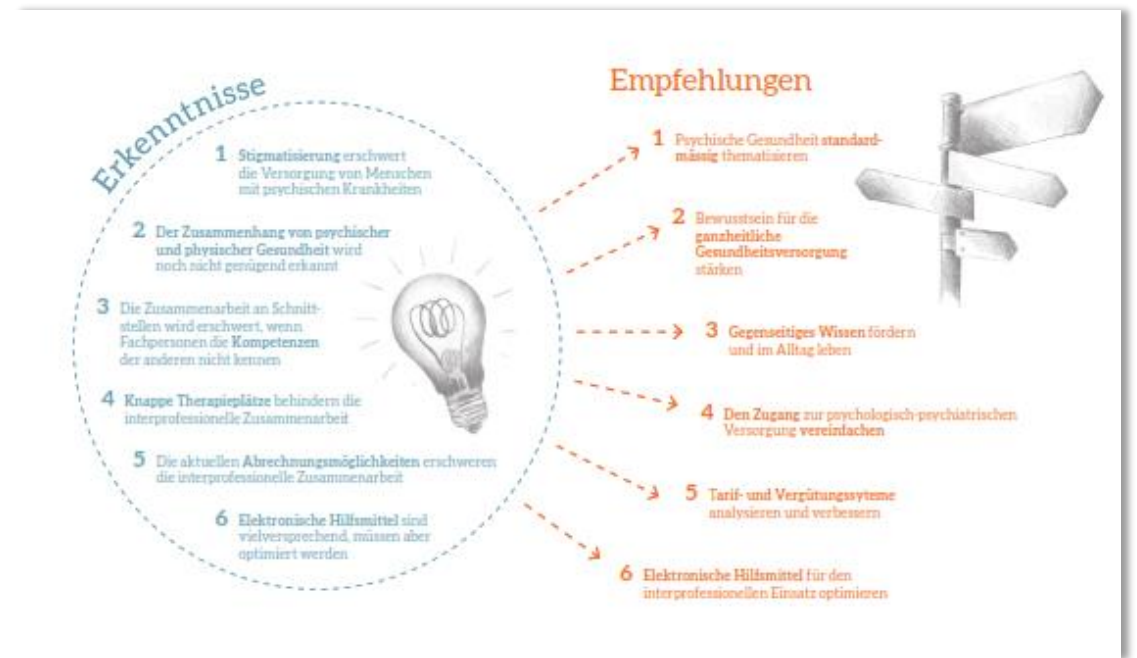

Interprofessionalität in der Bildung  
fördern

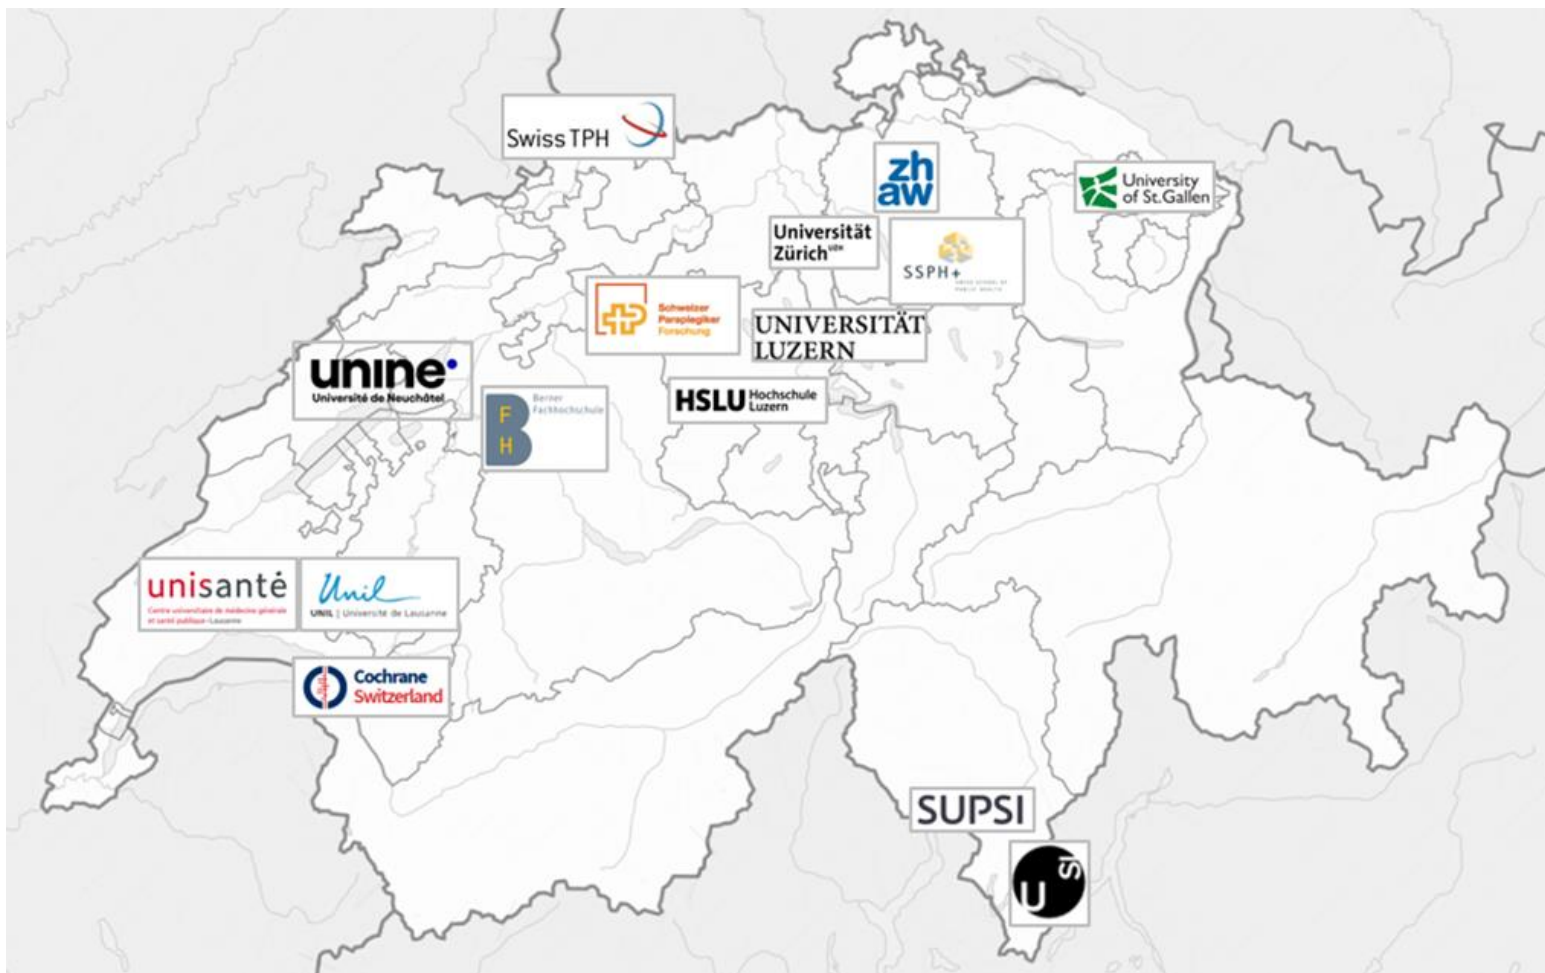

Interprofessionelle Zusammenarbeit in  
der stationären Versorgung stärken

# Lessons learned until today

Building learning health systems takes time, in particular:

- building learning communities and creating buy-in
- setting priorities that can address real world needs
- identifying and evaluating impact → monitoring is work in progress

Building learning health systems is a conceptual  
as much as it is a practical endeavour.

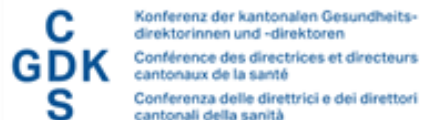

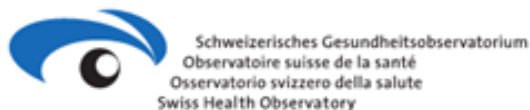

# Lessons learned until today

However, so far we also have seen the benefits of:

- ... creating and engaging in dialogue, a need expressed by many in the field of HSR ...
- ... , as it allows to create a culture of shared-decision making and co-creation ...
- ..., and which encourages a culture of continuous learning and improvement ...
- ... to address wicked problems.
